Sheila, Phil,

I just wanted to update you as I am leaving for a conference. I will return Thursday afternoon.  
-I submitted a request to Kisha to purchase the Wetlands maps from the University of South Dakota.  
-Created the additional two maps

-Updated Spreadsheets with latest calculations ( In each spreadsheet the top half contains the original calculations based on the topo lines. The second cluster contains calculations based on DEM.

**Subject:** Fw: Another request - Digitize National Wetland Inventory Maps

Michael - We'd like to digitize the National Wetland Inventory maps for Bristol Bay. There is a minor (<\$100) charge associated with purchasing this data. Is this something we can fund through your budget and, if so, who should we work with on purchasing this information? Thanks.

Subject: Another request - Digitize National Wetland Inventory Maps

Hi James,

I have a separate request. Can you digitize the National Wetland Inventory maps? The maps are only available in paper format. And in the wisdom of government the Alaska maps are not available in Alaska. The Fish and Wildlife Service has contracted the maps out to vendors, which are identified on the NWI website. I believe that the vendor for Alaska is the University of South Dakota.

Specifically, the area around Pebble would be useful to have in a digital format - the headwaters of the South Fork Koktuli, North Fork Koktuli (including the valley of TSF G) and Upper Talarik Creek. I don't have a good sense about how much work this would be, so please let me know if this is not a realistic request.

Thanks  
Phil
